I don't recognize the spreadsheet. We did have a contractor summarize a lot of the data, but I don't recognize this. And I don't recognize the monitoring stations on the quarterly tab. I have archived a lot of the files and I will be out of the office starting tomorrow until Monday. When I get back I will pull the files out and take a look.

In the mean time, AEC provided PDFs of all their DMRs for the previous five years as part of our 308. I loaded the PDFs on the G: drive at:

G:\WECA\Compliance Section 1\Moody\American Energy Corporation\AEC 5R (Jul 7, 2011)

As I recall, 013 at the AEC site was one of our sources of frustration. I think they report No Discharge (Ohio DMR Code 'AL') frequently, when we asked about this, AEC said they had changed the tributary area to pond 013 during construction of the wasterock disposal area. They said that the pond now is oversized and as such does not discharge. I don't think they are required to sample for sulfate.

The State does have the ability to export their daily DMR data to an excel document, and I think they can do it quickly. I don't know who our contact is since Abbot retired. If you want, I can check on Monday when I get back. Just let me know what data you want and how far back to go.

They hired a new guy to run the sanitary plant. He'd gotten that under control by the time we

went out there. he was actually well qualified!

There's sulfate data under the quarterly tab. Not sure what it represents. Super high fecal coliform in outfall 017. I won't be sampling that outfall if I can avoid it.

Wait a sec. I have this spreadsheet. There's no sulfate data, but there are TDS data. Jonathan, is this something WE CAB created or did AEC give this to us?

Wait another sec. I think Eric Nygaard may have given this to me a while back.

Jonathan,

Murphy's law, not to be confused with Murray Energy About that DMR binder I returned to you just last week...

Rob and Krista are helping me with the AEC objection letter and need some effluent data from Pond 013.

We figure some will be in there. So I would like to drop down and borrow it back.

Also do you know if OEPA has the DMRs electronically?, so its easier to do data manipulation for my brainiac coworkers ;)

Thanks

Jp
